Several years 250, if memory err not, I was ose of many English writers, who, under the anspice praying for an International Copyright between the two nations, which, properly, are not two na-tions—but one—indivisible by Parliament, Congrees, or any kind of human law or diplomacy, being already us ted by Heaven's act of Parliament and the everlasting Law of Nature and Fact. To that opinion I still adhers, and am like to continu adhering.

In discussion of the matter before any Congress or Parliament, manifold considerations and area mentations will necessarily arise, which to me ar not interesting, nor essential for beloing me to a decision. They respect the time and manner to which the thing should be, not at all whether the thing should be or not. In an ancient Book, revenced, I should hope, on both sides of the Ocean, it was thousands of years ago written down in the most decided and explicit manner, 'Thou shall not steal.' That thou belongest to a different 'maand canst steal without being certainly hanged for it, gives thee no permission to steal. od for it, gives thee no permission to the same shalt not in any wise steal at all! So it is written down for Nations and for Men, in the Law Book of the Maker of this Universe. Nay, poor Jeremy Benkim and others, step in here, and will demonstrate that it is actually our tene convenience and expediency not to steal; which I, for my sluce on the great scale, and on the small, and in conceivable scales and shapes, do also firmly be lieve it to be. For example, if nations abstained from stealing, what need were there of fightingwith its butcherings and burnings-decidedly the most expensive thing in this world?
